

### About Gains

Family progress checkpoints were obtained in the fall of 2016, midyear (January/February), and in the spring around April. New families enroll into Head Start/Early Head Start throughout the year at different times allowing some families to only have had two check points but still made progress!

The life areas represented in the chart are tied to the National Head Start “Parent, Family, and Community Engagement Framework (PFCE)” Family Outcomes. A recorded number of 470 families are represented in the attached graph. As documented families displayed steady gains in most areas with the exception of emotional support systems. Most families reported gains and increased their level of stability. Some individual families gained in numbers as high as 12% to-17% across the board.
